

**Electric Pallet Lifter**

Electric Pallet Lifter is a kind of storage equipment with battery power as energy and motor as power source. The main structures include: battery, motor, hydraulic pump, oil cylinder, piston rod, fork, chain, controller and so on. Its main function is to lift the weight to the required height. It is generally used in warehouses, workshops and other places requiring logistics handling. It can greatly improve the efficiency of warehousing with the use of pallets. Therefore, the electric stacker is also known as the electric pallet stacker.

## 1. Introduction of the hand Electric Pallet Lifter

**1. Electric Pallet Lifter**

Electric Pallet Lifter, electric stacker, full electric stacker, an industrial handling vehicle powered by motor and powered by battery, refers to various wheeled handling vehicles for loading, unloading, stacking, stacking and short-distance transportation of packaged pallet goods. International Organization for Standardization ISO / TC110 is called industrial vehicle. Electric stacker includes: full electric stacker, semi electric stacker, forward moving stacker, forward moving full electric stacker, forward moving stacker and walking balance weight stacker. The basic operation functions of the electric stacker are divided into horizontal handling, stacking / picking, loading / unloading and picking. According to the operation function to be achieved by the enterprise, it can be preliminarily determined from the company's product series. In addition, special operation functions will affect the specific configuration of the stacker, such as paper rolls, molten iron, etc. it is necessary to install accessories on the stacker to complete special functions. The operation requirements include general requirements such as pallet or cargo specifications, lifting height, operation channel width and climbing degree. At the same time, it is also necessary to consider the requirements of operation habits (such as habitual driving or standing driving), operation efficiency (different models have different efficiency), etc.

**2. Product Specification of the Electric Pallet Lifter**

WESCO INDUSTRIAL PRODUCTS 261024 SPECS	
Width	25 1/2 Inches
Depth	36 Inches
Height	92 Inches

Capacity	1,000 lb.
Caster Size	4 Inches
Casters	Yes
Color	Red
Made in America	Yes
Material	Steel
Number of Casters	2
Platform Material	Steel
Power Type	Battery
Style	Open
	Platform
Type	Stackers
Wheel Type	Phenolic

### **3.Electric Pallet Lifter Feature And Application**

The basic operation functions of the electric stacker are divided into horizontal handling, stacking / picking, loading / unloading and picking. According to the operation function to be achieved by the enterprise, it can be preliminarily determined from the company's product series. In addition, special operation functions will affect the specific configuration of the stacker, such as paper rolls, molten iron, etc. it is necessary to install accessories on the stacker to complete special functions.

### **4.Product Details of the Electric Pallet Lifter**

(1) Body design is exquisite, flexible operation, and labour saving impulse.

(2) Built-in high-energy sealed battery, Long-term use without maintenance, so you don't need to add water during the period of life.

(3) Foot brake operation is user-friendly.

(4)Electricity meter is configured, so as to remind operators charge timely, and convenient to protect the battery.

## 5.Product Qualification

Shanghai Yiyong Hoisting Machinery Co., Ltd. is an enterprise specializing in the production of small hoisting tools and hoisting machinery such as electric hoist, chain hoist, chain hoist, monorail trolley, Jack and tank car. The headquarters of the company is located in Baoshan, Shanghai. With developed economy, convenient transportation and effective resource allocation, the enterprise has the advantages of climate, geography and people at the same time. We advocate that service without after-sales service is good service. We have the confidence and responsibility to ensure that each set of goods is subject to rigorous inspection before leaving the factory to ensure the safety of users.

Deliver,Shipping And Serving

## 6.Packaging Details

pallet

Port

Xiamen / Shanghai / Ningbo

Lead Time:

Quantity(Units) 1 - 1>1

Est. Time(days) 10 To be negotiated

## 7.FAQ

### (1)HOW IS YOUR PRICE COMPARED WITH MANUFACTURERS / FACTORIES?

In addition to Isoland's own manufacturing system products,we are also distributors of major manufacturers in China.Besides being able to meet the various needs of customers, we are constantly treated with best dealership price. From numerous comparison and feedback from clients our price is more competitive .

### (2) HOW IS YOUR DELIVERY TIME?

In general circumstance, we can have an immediate delivery of regular machines for our clients within 7 days, because we have a variety of resources to check machines in stock, locally and nation widely and to receive machines in timely manner. But for manufacturers,it will take more than 30 days to produce the ordered machine.

### (3) HOW SOON CAN YOU RESPOND CUIENT INQUIRIES?

Our team is consisted of a group of diligent and dynamic people, working 24/7 to respond client inquiries and questions all the time. Most problems can be solved within 8 hours!

### (4) WHICH PAYMENT TERMS CAN YOUACCEPT?

Normally we can work on T/T term or L/C term, sometime DP term.

1) On T/T term, 30% down payment is required in advance, and 70% balance shall be settled before shipment, or against the copy of original B/L for long-term cooperating client.

2) On L/C term, a 100% irrevocable L/C without "soft clauses" from an international recognized bank can be accepted. Please seek the advice from the individual sales manager whom you work with.
